# Helps Keep Your Doors Open and Employees Safe

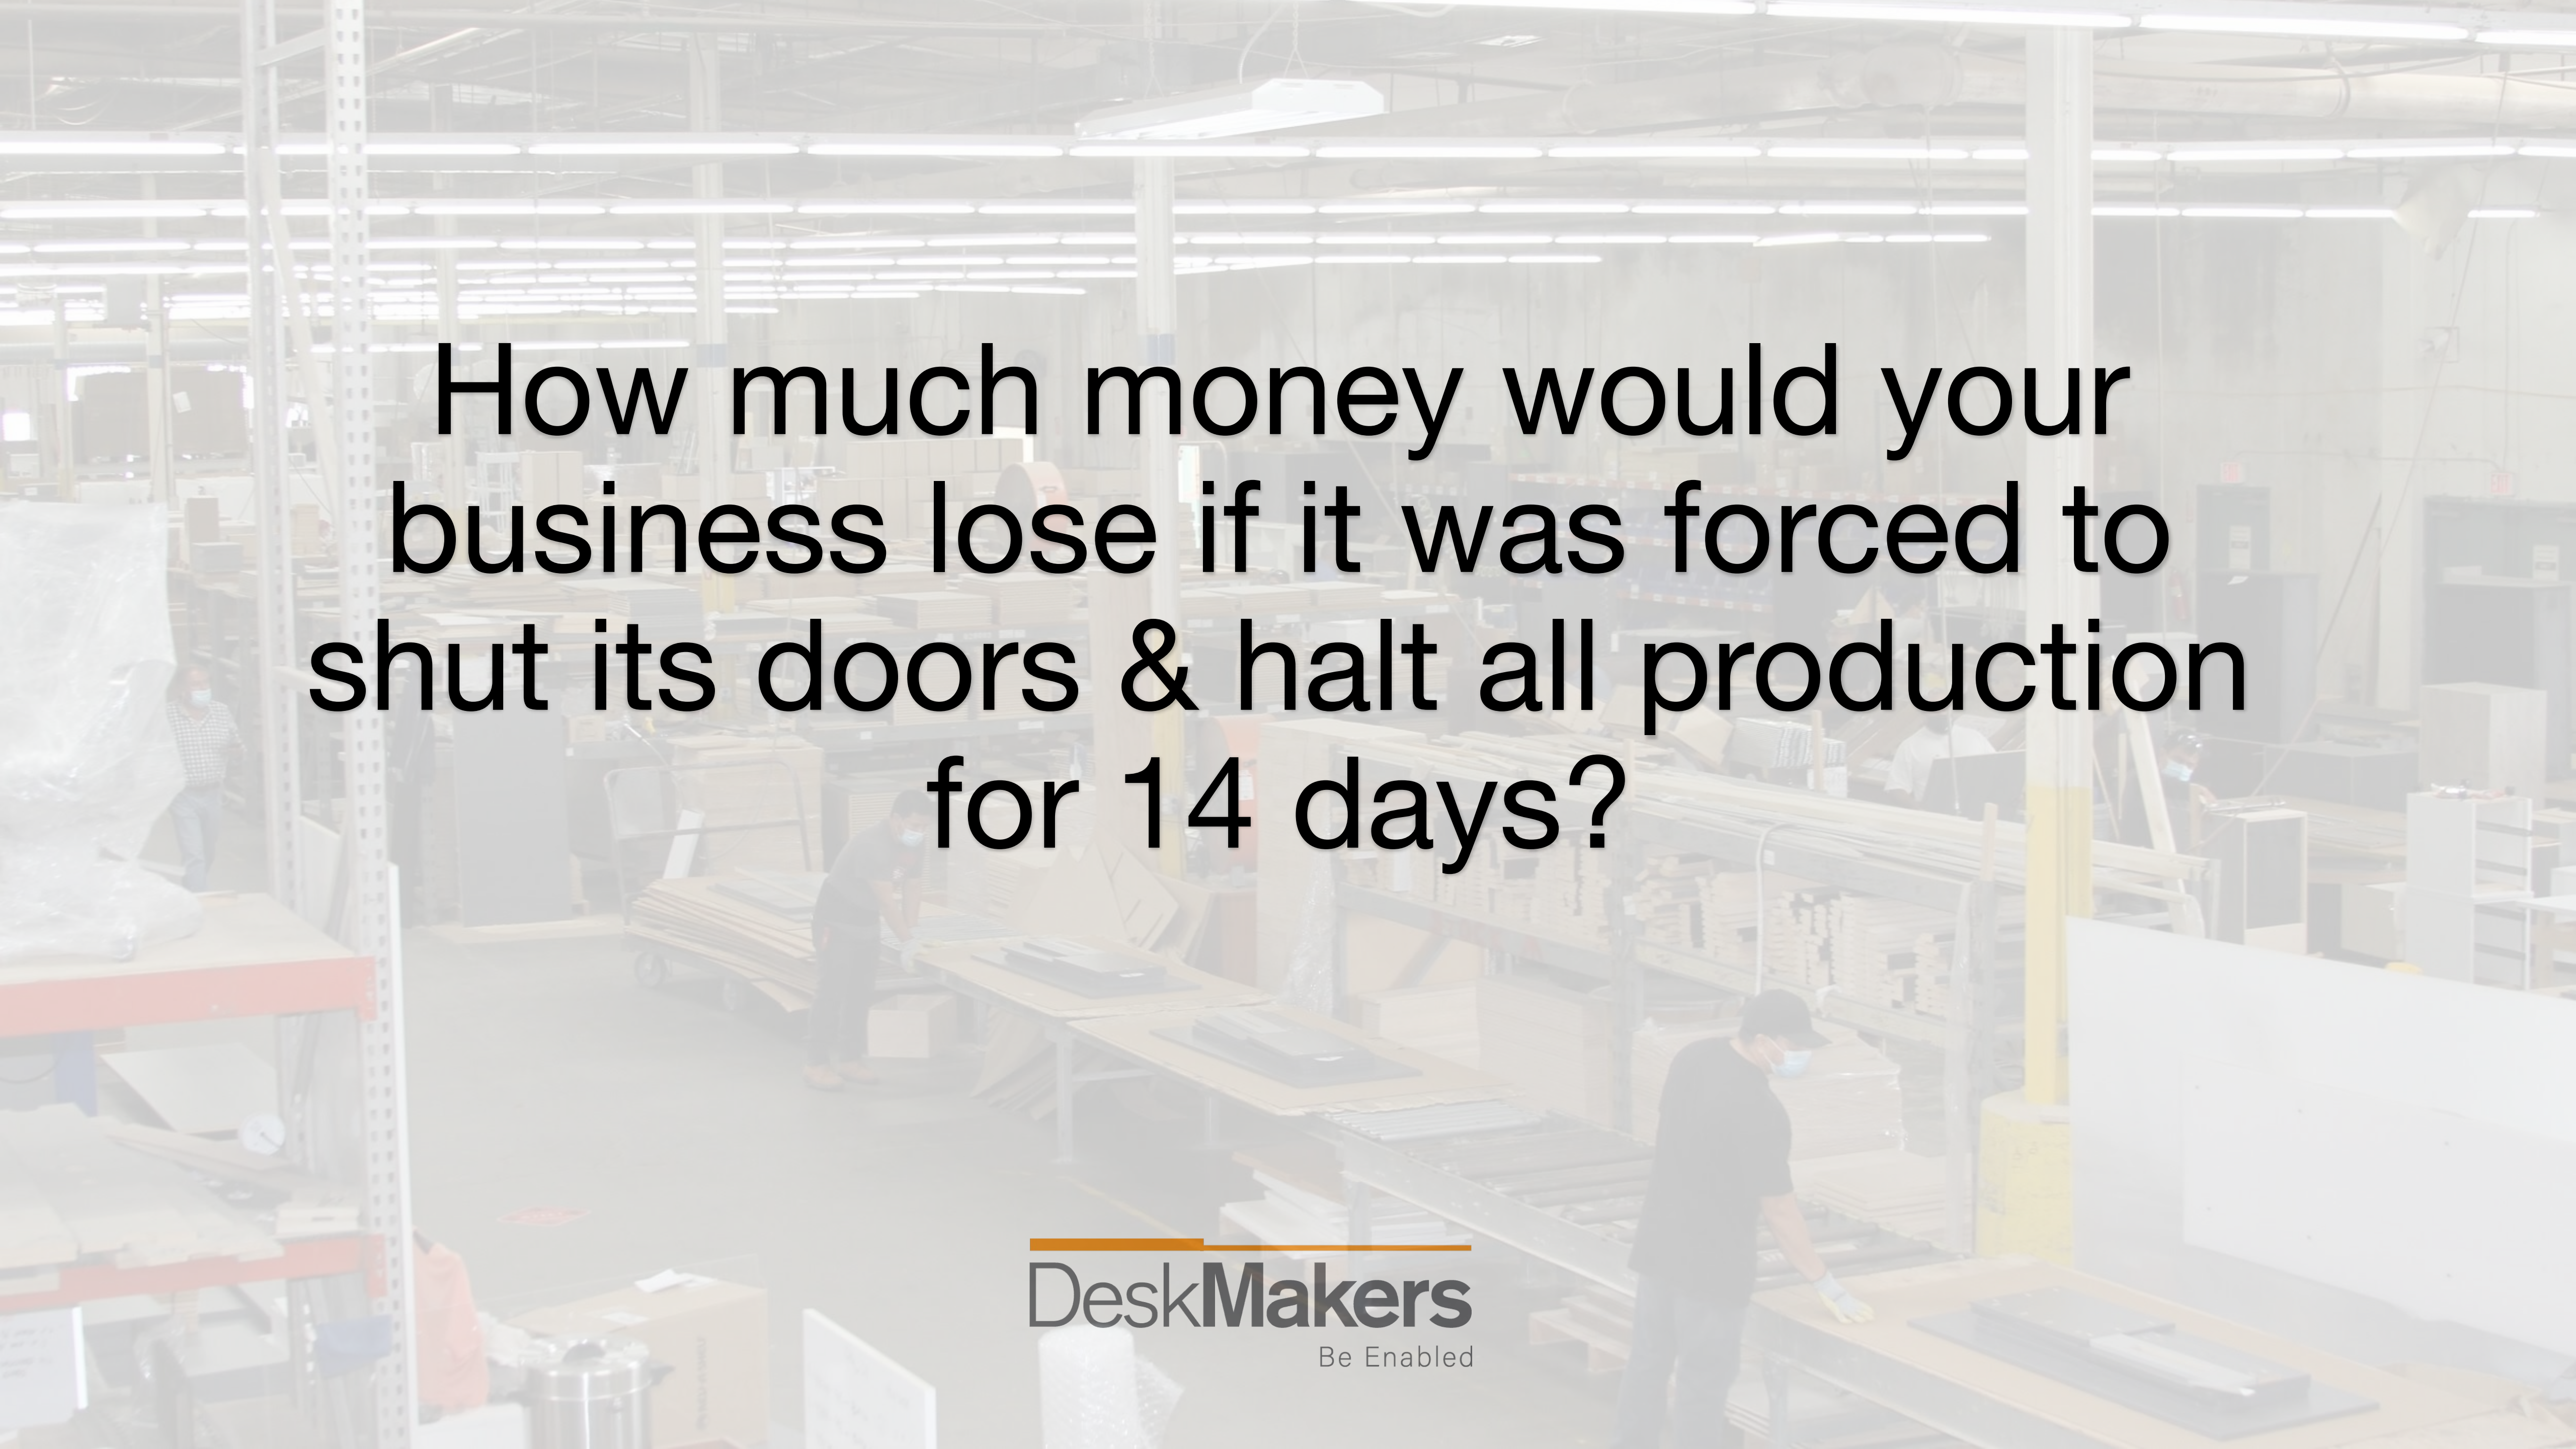

---

CASE STUDY

---

Desk**Makers**

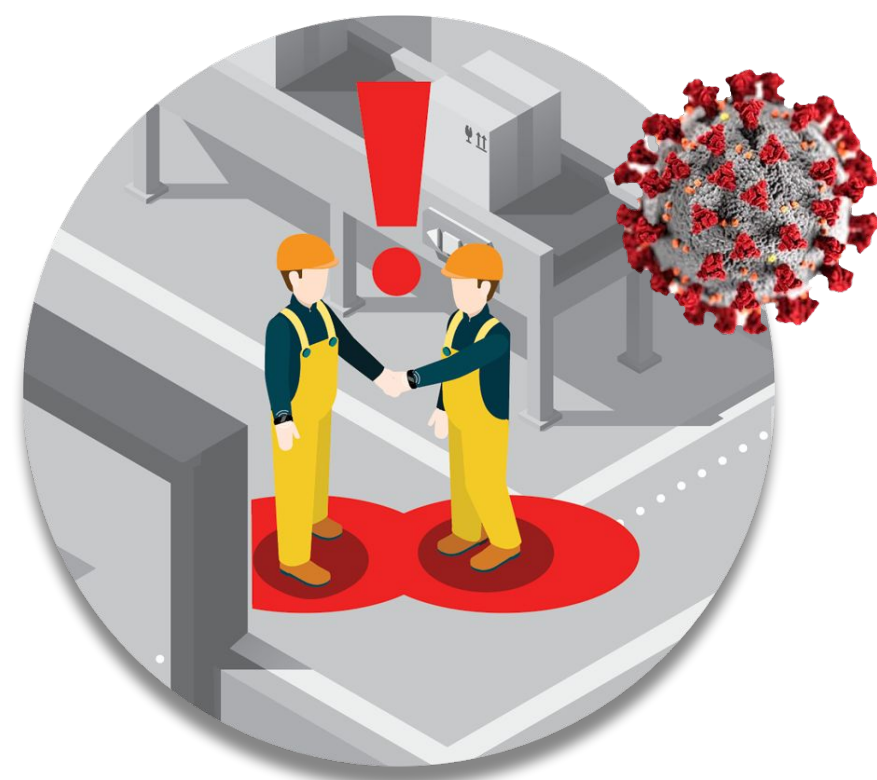

How much money would your  
business lose if it was forced to  
shut its doors & halt all production  
for 14 days?

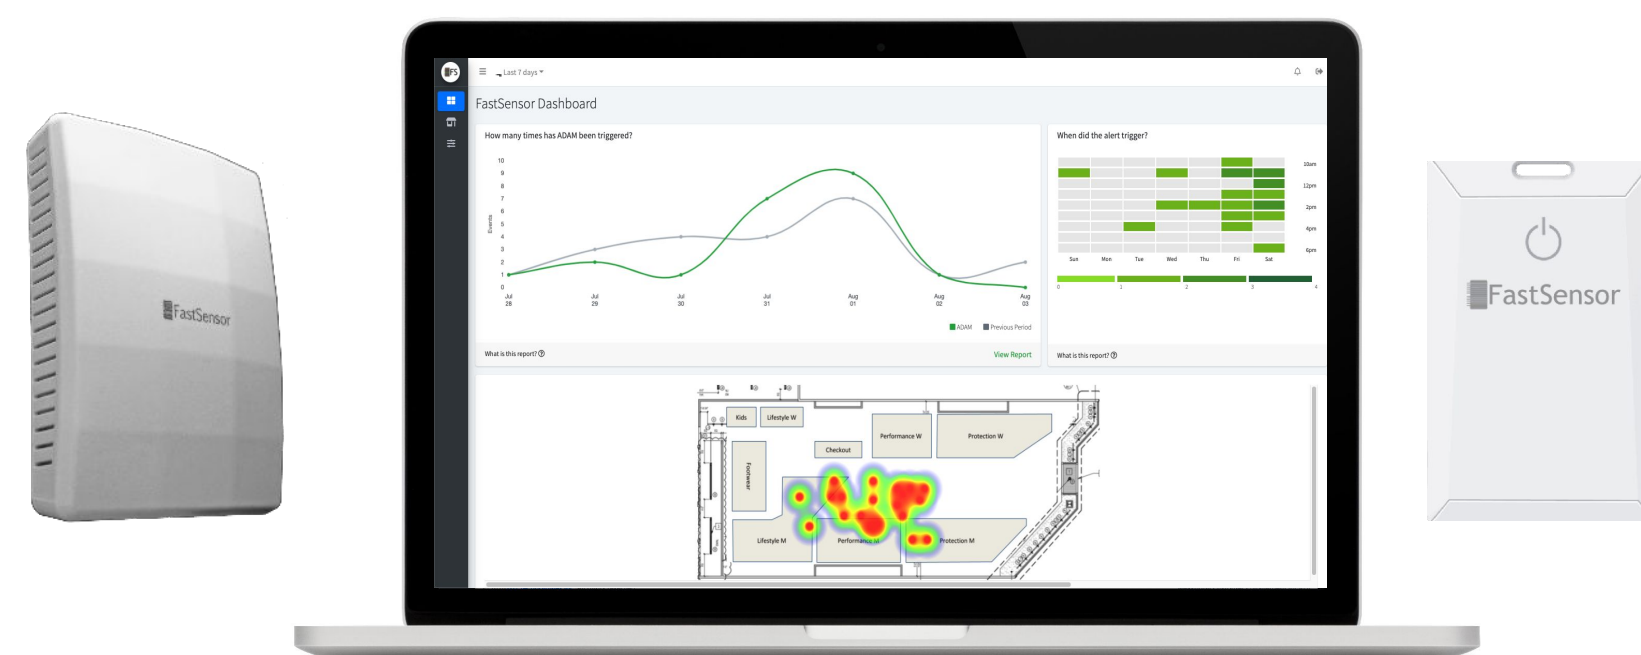

## The Challenge

Assist DeskMakers in managing social distancing and contact tracing in large, warehouse-like environment to keep employees safe, doors open, and business booming

## Our Solution

### FastSensor **ADAM** Active Distance Alert and Monitoring

FastSensor installed ADAM (Active Distance Alert & Monitoring) Solutions with sensors and badges to accurately account for movement across the factory floor to locate problematic hot zones and protocol violations, managed through an online dashboard

## The Results

With ADAM, DeskMakers successfully monitored social distancing and contact tracing, was able to eliminate extraneous shifts and even prevented a COVID-19 outbreak from shutting down their facility

**“It was really scary at first.  
We heard about all these places  
closing down....  
We all thought we were going to  
lose our jobs.”**

**Michael B.**  
Product Manager, DeskMakers

# 18 days after installing ADAM in their facility, DeskMakers learned that one of their employees had tested positive for COVID-19

## 1. Contact Trace

Using FastSensor's dashboard and data, DeskMakers pinpointed each interaction the positive employee had had with other workers, and performed critical contact tracing in real-time with ADAM

## 2. Testing / Isolate

Individuals who had been in contact with the positive employee were immediately alerted and analyzed

## 3. Stay Open

Thanks to ADAM and responsible leadership, DeskMakers was able to prevent a large-scale outbreak amongst employees, preventing the organization from closing its doors completely

### First 18 Days

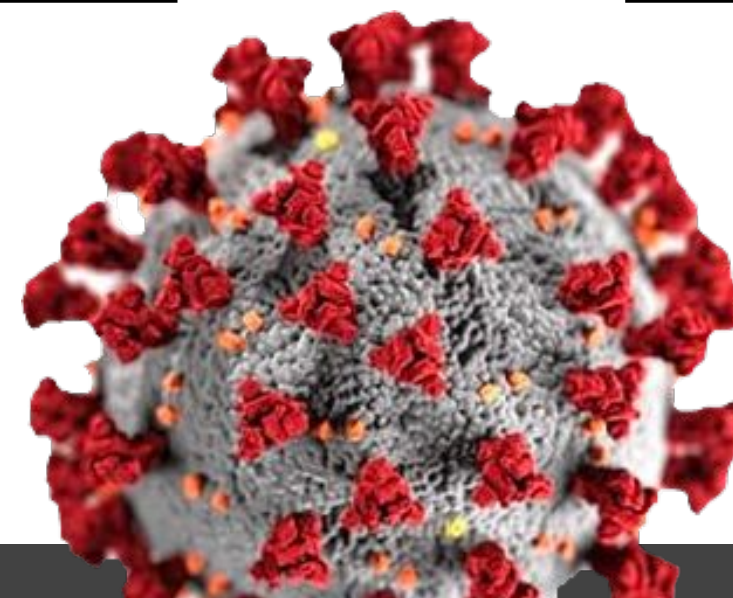

In the first 18 days, ADAM tallied a total of 213 violations, peaking at 68 in a single shift and averaging nearly 15 daily alerts

**213**  
Violations

### Next 14 Days

Following the positive test and rapid response, employees further observed distancing protocol and in the subsequent two weeks saw a total of only *four* alerts

**4**  
Violations

With many businesses struggling amidst the global COVID-19 pandemic, FastSensor helped keep a local company operational, earning [positive media coverage](#) for both organizations

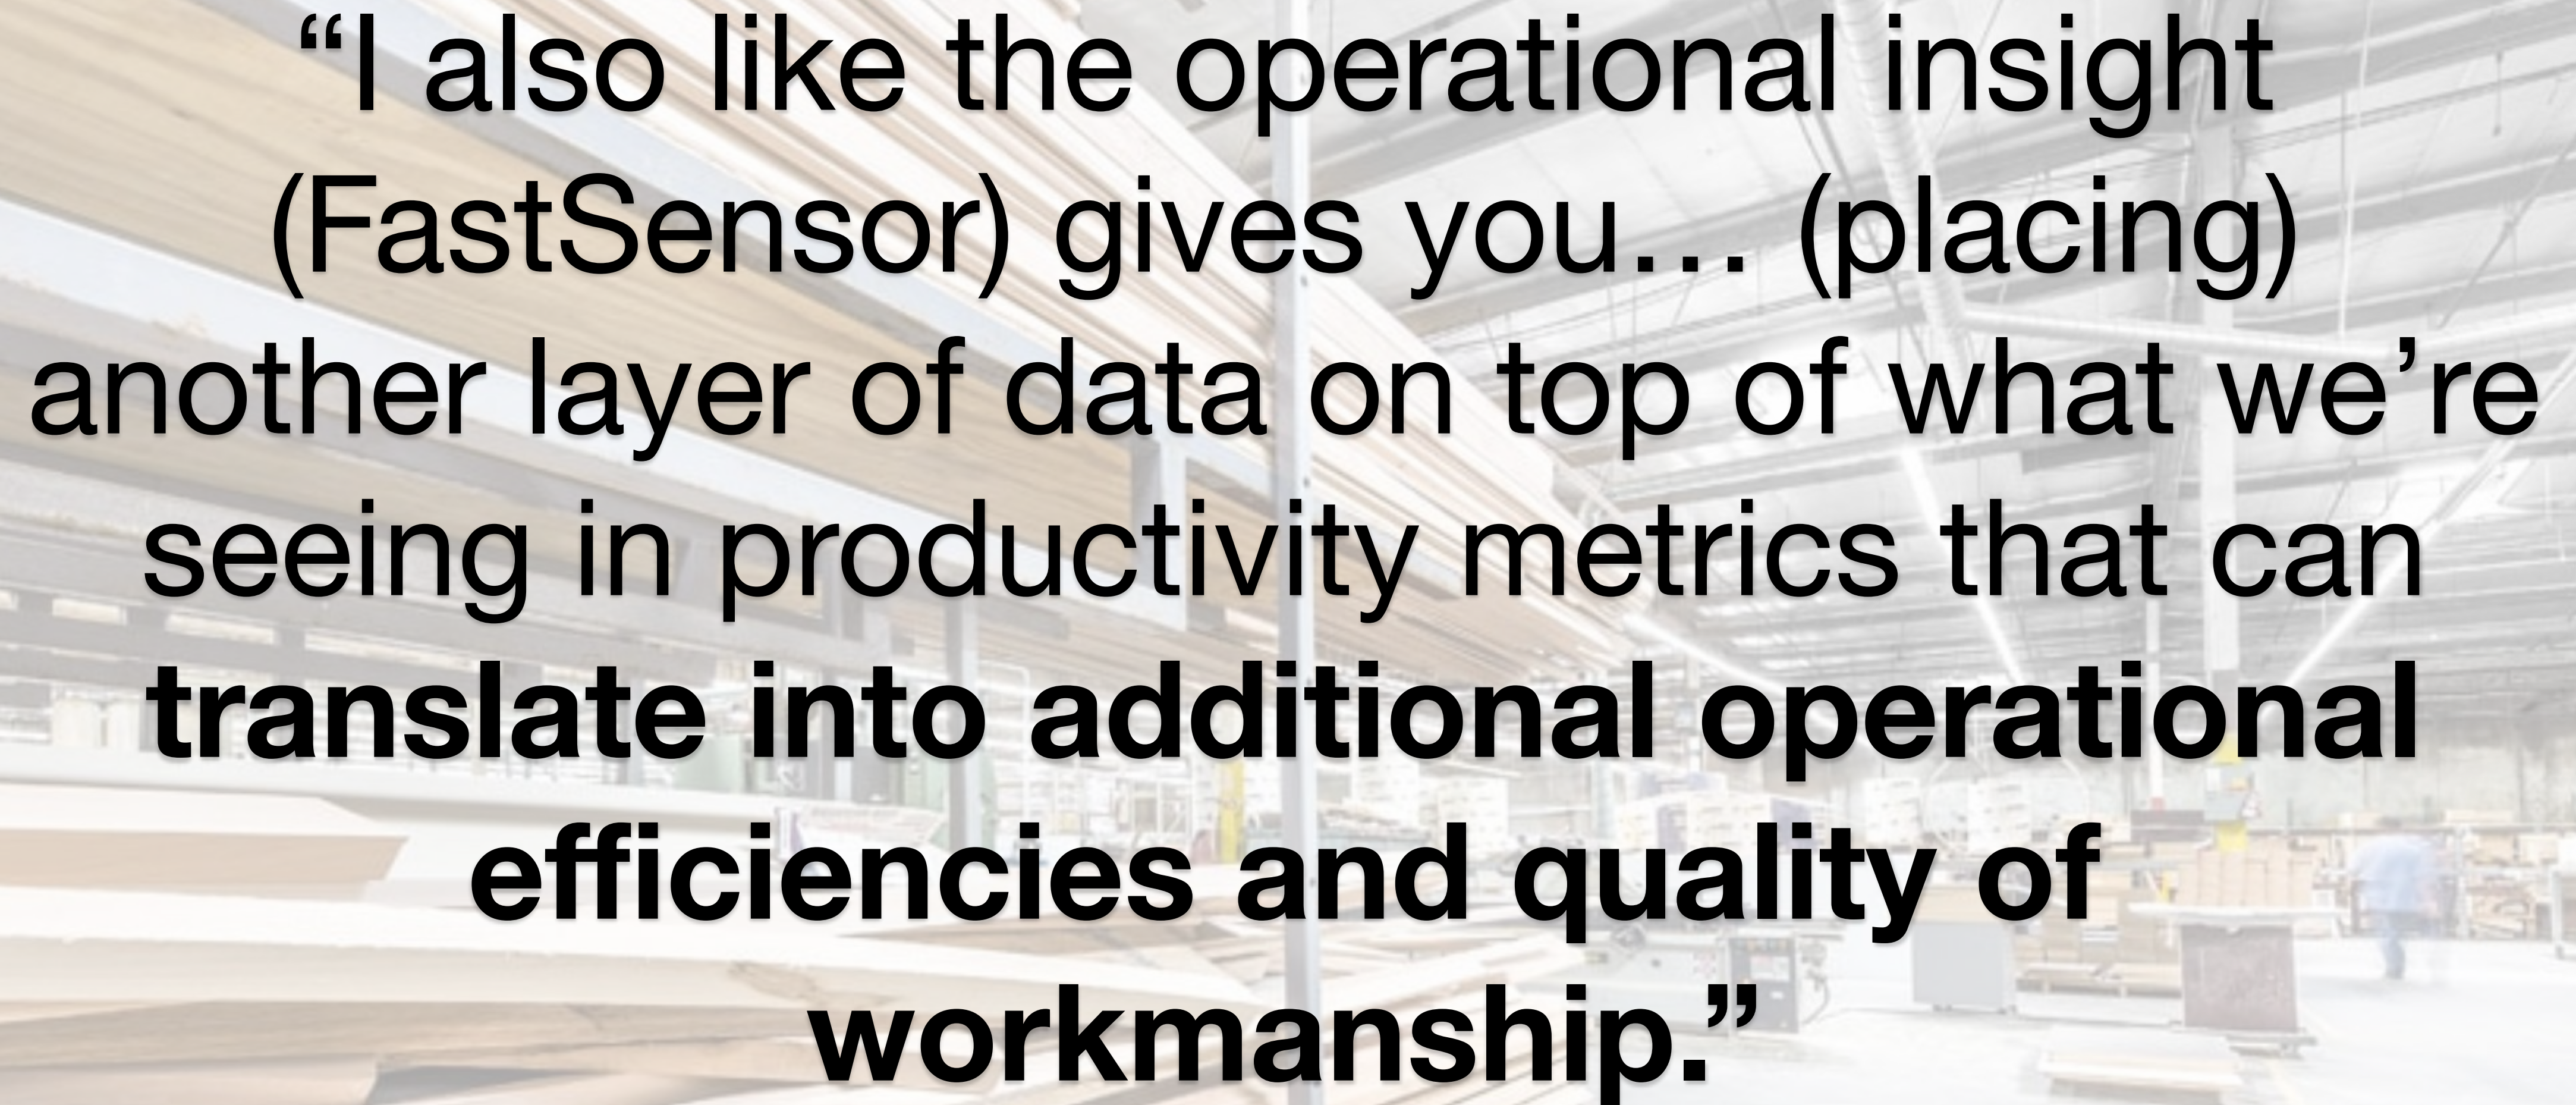

## Artificial Intelligence Helping Commerce Factory Remain Open Amid Pandemic

**“I also like the operational insight  
(FastSensor) gives you... (placing)  
another layer of data on top of what we’re  
seeing in productivity metrics that can  
translate into additional operational  
efficiencies and quality of  
workmanship.”**
